

**CONSULATE GENERAL OF THE
UNITED STATES OF AMERICA
MILAN, ITALY**

HEALTH AND MEDICAL INFORMATION

CONTENTS

This is a list of English speaking physicians and dentists, available for private consultation by American citizens in Milan, Turin, Genoa, Trieste, Venice area, and Verona.

In case you need any information on doctors or medical facilities in other areas within our jurisdiction, please refer to the Italian Medical Association ("Ordine dei Medici") in the area of your interest -- <http://portale.fnomceo.it>

The Consulate General cannot assume any responsibility as to the quality of the medical services rendered; under no circumstances should the list be considered as an endorsement or a recommendation by the US Government.

HOSPITALS AND CLINICS

A list of major hospitals in Milan, Turin, Genoa, Trieste Venice, and Verona is also provided hereafter.

Medical facilities in Italy are adequate for any emergencies that may arise. Public hospitals are operated by the National Health Service, and charge flat, all-in-one rates depending on a diagnosis-related group (DRG) classification. These rates typically include all medical services, surgery (if applicable), bed and board, etc.

Residents of Italy who are covered by the National Health Service (and their dependents) will be provided hospital services free of charge. Tourists are expected to have travel insurance when they come to Italy. Visitors, or persons not enrolled under the National Health Service plan, are expected to pay hospital charges in full and then claim a reimbursement from their insurance carrier, if applicable. Some hospitals do not take credit cards; but some may agree to bill patients after discharge. There are also a number of private hospitals and clinics offering a wide range of medical services. Their charges, although variable, are generally higher than those applied by public hospitals.

MEDICAL EMERGENCIES

In case of an emergency, head to the nearest hospital. Most general and regional hospitals have emergency rooms, which operate 24/7. To call an ambulance, or if you are in need of immediate medical attention, dial **112** (toll free) from any telephone in Italy.

In Italy, triage applies a color coding system under which patients arriving at the hospital Emergency Department are rapidly classified based on the severity of their injuries: red (life threatening conditions – very critical), yellow (potentially life threatening conditions – moderately critical), green (minor injuries or illness – not very critical), and white (non-urgent conditions – not critical) and patients are treated according the level of urgency assigned at the check in, not in order of arrival.
